**Weather Report: Surf's Up!  
Jumbo Waves!**

## Mudslides and Earthquakes and Firestorms...oh my!

These kind of events must be the reason why the cost of living in Southern California is so \*&^% high. Where else could you enjoy a front row seat to Mother Nature's catastrophes?

## December Cover of GQ/Dog Fancy Magazine

JR is finished with UC Irvine and is currently working in the film industry ; ) Although there are infrequent sightings of the lad, we believe he is well and thriving. He is contemplating further education, perhaps in law. Carpe Diem.

## It's Dogmatical

Stella was on her way to dog agility stardom when, like other young celebrities, she ran amok. She has refused key obstacles like a-frames, teeters, and walks. Says stage mother and trainer, Pat Staley: "She continues to weave and jump like a champ but when it comes to those other obstacles, she digs her paws in and says no way." Well, let's see how the little Princess likes training for the Iditarod instead.

Pop Culture Trivia:

IF Brad + Angelina = Brangelina

IF Tom + Katie = TomKat

THEN Mr Staley + Mrs Staley = PatPat

## Observing the Big One on the Big One

PatPat will be celebrating Christmas in Kona Hawaii for a week of SCUBA diving. They hope to see their friends, The Mantas (below), on a night dive, plus hundreds of other fascinating critters. They will also go check on the volcano for a much needed pyro fix. Right.

*Giant Manta Ray off the Kona Coast  
with 20' span from tip to tip – just  
imagine 8-10 of these majestic giants  
swooping over your head, grazing on  
plankton. Honestly, they don't care for  
human entrees!*
